

Repco branded tools are guaranteed against faulty materials and workmanship for the life of the product.

All tools are made to meet or exceed relevant ANSI and DIN manufacturing standards. Chrome tools are manufactured from high grade forged Chrome Vanadium Alloy Steel which not only means **a Repco tool is built to last** but means your tools will always look new. The range has been carefully selected to cover the most widely used tools by the professional trade.

This guarantee does not cover abuse, misuse, overloading, neglect of normal maintenance or normal wear and tear. Each Repco branded tool is designed and manufactured for a specific purpose, and if used for purposes other than the intended purpose they will not be covered by this guarantee. The benefits conferred by this guarantee are additional to all rights and remedies in respect of hand tools as covered in the Trade Practices Act (Aust), Fair Trading Act (NZ) and other state and territory laws and regulations in Australia and New Zealand. Tools which fail due to manufacturing defects or material faults may be returned to any Repco outlet in Australia or New Zealand for repair or replacement at Repco's sole discretion.

For a quality tool that won't let you down, select Repco tools.
